Total	340,994	1,083,608	162,822	89,212	73,609	

¹Note: The table illustrates the estimated increase in participation States will have to achieve over current levels to satisfy the participation requirements in the Deficit Reduction Act of 2005 and accompanying regulations. The State-by-State estimates are based on preliminary FY 2005 data and estimate the impacts of various provisions on participation rates, including the requirement to add families receiving assistance in a separate State program and certain child-only families, the exclusion of families caring for a disabled family member, and the caseload reduction credit. The estimates do not assume changes in State behavior that could affect these impacts. They also do not model the impact of all program changes, such as changes in work activity definitions or the provision for excused absences for non-paid work activities. These latter provisions have relatively minor and/or offsetting effects in most States.

²This calculation assumes that the caseload declines from FY 2005 to FY 2006 at the same rate as the decline from the second quarter of FY 2005 to the second quarter of 2006. It is assumed that no caseload declines are due to policy changes that would be excluded from the credit calculation.

³Engaged adults are participating for an average of at least 1 hour per week in one of the 12 activities that count toward the work participation rates.
